

The Loft at Studio J Audio Visual Tutorial

All A/V Equipment is located in the NW corner in room label "9" by the street light opposite the large windows.

USB and Bluetooth

House Computer - Mac mini with keyboard, mouse and USB connection can be used for Google docs, slides, music, etc. This is projected by default on TVs and projector. Guests should bring their own laptop with HDMI out, presentation clicker (slide advancer), and all software needed for presentation (PowerPoint etc). Use bluetooth audio connection and large HDMI cable if laptop is desired out in the room. Bluetooth audio has a range of only about 20-30 feet and needs to be paired by pressing top button. Note: Other devices could "steal" the bluetooth connection.

Switcher - switches input from house computer to guest laptop. Press button on right to switch input.

HDMI input for laptops (left)
XLR audio feed out for video (right)
Power and iPhone charger available

Projector - 1080p and roughly 70" screen

Screen - needs to be requested to be hung and is removable.

Downlights on brick wall - slide up Red / Green / Blue sliders to get desired color on wall.

Remotes - TVs on left, projector on right. Hit projector power twice to turn it off.
